C.S.H.B. No. 1158

A BILL TO BE ENTITLED

1 AN ACT  
2 relating to advanced clean energy projects and certain other  
3 projects that reduce or eliminate emissions of carbon dioxide or  
4 other pollutants.

5 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

6 SECTION 1. Section 382.003(1-a), Health and Safety Code, is  
7 amended to read as follows:

8 (1-a) "Advanced clean energy project" means a project  
9 ~~[for which an application for a permit or for an authorization to~~  
10 ~~use a standard permit under this chapter is received by the~~  
11 ~~commission on or after January 1, 2008, and before January 1, 2020,~~  
12 ~~and] that:~~

13 (A) involves the use of coal, biomass, petroleum  
14 coke, solid waste, natural gas, or fuel cells using hydrogen  
15 derived from such fuels, in the generation of electricity, or the  
16 creation of liquid fuels outside of the existing fuel production  
17 infrastructure while co-generating electricity, whether the  
18 project is implemented in connection with the construction of a new  
19 facility or in connection with the modification of an existing  
20 facility and whether the project involves the entire emissions  
21 stream from the facility or only a portion of the emissions stream  
22 from the facility;

23 (B) with regard to the portion of the emissions  
24 stream from the facility that is associated with the project, is

1 capable of achieving:

2 (i) on an annual basis:

3 (a) a 99 percent or greater reduction  
4 of sulfur dioxide emissions;

5 (b) if the project is designed for the  
6 use of feedstock, substantially all of which is subbituminous coal,  
7 an emission rate of 0.04 pounds or less of sulfur dioxide per  
8 million British thermal units as determined by a 30-day average; or

9 (c) if the project is designed for the  
10 use of one or more combustion turbines that burn natural gas, a  
11 sulfur dioxide emission rate that meets best available control  
12 technology requirements as determined by the commission;

13 (ii) on an annual basis:

14 (a) a 95 percent or greater reduction  
15 of mercury emissions; or

16 (b) if the project is designed for the  
17 use of one or more combustion turbines that burn natural gas, a  
18 mercury emission rate that complies with applicable federal  
19 requirements;

20 (iii) an annual average emission rate for  
21 nitrogen oxides of:

22 (a) 0.05 pounds or less per million  
23 British thermal units;

24 (b) if the project uses gasification  
25 technology, 0.034 pounds or less per million British thermal units;

26 or

27 (c) if the project is designed for the

1 use of one or more combustion turbines that burn natural gas, two  
2 parts per million by volume or an emission rate that meets best  
3 available control technology requirements as determined by the  
4 commission; and

5 (iv) an annual average emission rate for  
6 filterable particulate matter of 0.015 pounds or less per million  
7 British thermal units; and

8 (C) captures not less than 75 [~~50~~] percent of the  
9 carbon dioxide in the portion of the emissions stream from the  
10 facility that is associated with the project and sequesters that  
11 captured carbon dioxide by geologic storage or other means.

12 SECTION 2. Section 391.002(b), Health and Safety Code, is  
13 amended to read as follows:

14 (b) Projects that may be considered for a grant under the  
15 program include:

16 (1) advanced clean energy projects, as defined by  
17 Section 382.003;

18 (2) new technology projects that reduce emissions of  
19 regulated pollutants from stationary sources;

20 (3) new technology projects that reduce emissions from  
21 upstream and midstream oil and gas production, completions,  
22 gathering, storage, processing, and transmission activities  
23 through:

24 (A) the replacement, repower, or retrofit of  
25 stationary compressor engines;

26 (B) the installation of systems to reduce or  
27 eliminate the loss of gas, flaring of gas, or burning of gas using

1 other combustion control devices; or

2 (C) the installation of systems that reduce  
3 flaring emissions and other site emissions; ~~and~~

4 (4) electricity storage projects related to renewable  
5 energy, including projects to store electricity produced from wind  
6 and solar generation that provide efficient means of making the  
7 stored energy available during periods of peak energy use;

8 (5) projects that utilize technology to capture, use,  
9 reuse, store, gather, transport, or sequester carbon dioxide  
10 emissions from a new or existing petrochemical plant or electric  
11 generation facility, including a facility powered by coal, natural  
12 gas, hydrogen, or ammonia, for the principal purpose of preventing  
13 carbon dioxide from entering or remaining in the atmosphere; and

14 (6) projects that involve the use of renewable energy  
15 to produce hydrogen fuel for use in transportation, agricultural,  
16 or industrial processes and result in a reduction of pollutants  
17 entering the atmosphere.

18 SECTION 3. Section 151.334, Tax Code, is amended to read as  
19 follows:

20 Sec. 151.334. COMPONENTS OF TANGIBLE PERSONAL PROPERTY USED  
21 IN CONNECTION WITH CERTAIN CLEAN ENERGY PROJECTS OR BY CARBON  
22 CAPTURE FACILITIES ~~[SEQUESTRATION OF CARBON DIOXIDE]~~. Components  
23 of tangible personal property used in connection with an advanced  
24 clean energy project, as defined by Section 382.003, Health and  
25 Safety Code, or a clean energy project, as defined by Section  
26 120.001, Natural Resources Code, or purchased and installed by a  
27 carbon capture facility are exempted from the taxes imposed by this

1 chapter if[+]

2           ~~[(1)]~~ the components are installed to capture carbon  
3 dioxide from the atmosphere or an anthropogenic emission source,  
4 transport or inject carbon dioxide from the atmosphere or an  
5 anthropogenic emission ~~[such a]~~ source, or prepare carbon dioxide  
6 from the atmosphere or an anthropogenic emission ~~[such a]~~ source  
7 for transportation or injection[+] and:

8           (1) ~~[(2)]~~ the carbon dioxide is sequestered in this  
9 state[+]

10           ~~[(A)]~~ as part of an enhanced oil recovery project  
11 that qualifies for a tax rate reduction under Section [202.0545](#), as  
12 provided by Subsection (c) of that section; or

13           (2) the components are used in connection with the  
14 capture, use, reuse, storage, injection, or sequestration of carbon  
15 dioxide emissions to prevent ~~[(B) in a manner and under conditions~~  
16 ~~that create a reasonable expectation that at least 99 percent of~~  
17 ~~the]~~ carbon dioxide from entering or remaining in ~~[will remain~~  
18 ~~sequestered from]~~ the atmosphere ~~[for at least 1,000 years]~~.

19           SECTION 4. The change in law made by this Act to Section  
20 [151.334](#), Tax Code, does not affect tax liability accruing before  
21 the effective date of this Act. That liability continues in effect  
22 as if this Act had not been enacted, and the former law is continued  
23 in effect for the collection of taxes due and for civil and criminal  
24 enforcement of the liability for those taxes.

25           SECTION 5. This Act takes effect September 1, 2023.
