

Amend CSHB 1567 as follows:

(1) In SECTION 7 of the bill, strike proposed Section 401.216(b), Health and Safety Code (Senate committee printing page 6, lines 32-36), and reletter subsequent subsections accordingly.

(2) In SECTION 7 of the bill, after proposed Section 401.216, Health and Safety Code (Senate committee printing page 6, between lines 42 and 43), insert the following:

Sec. 401.2165. VOLUME LIMITS FOR FEDERAL FACILITY WASTE.

(a) In this section, "Class A low-level radioactive waste," "Class B low-level radioactive waste," and "Class C low-level radioactive waste" have the meanings assigned by the department by rule.

(b) The department shall limit the overall capacity of the federal facility waste disposal facility to not more than 1,333,333 cubic yards.

(c) The combined volume of Class B low-level radioactive waste and Class C low-level radioactive waste accepted at the federal facility waste disposal facility may not exceed 5,000 cubic yards.

(d) The volume of containerized Class A low-level radioactive waste accepted at the federal facility waste disposal facility may not exceed 10,000 cubic yards.

(e) The volume of uncontainerized Class A low-level radioactive waste accepted at the federal facility waste disposal facility may not exceed 1,318,333 cubic yards.

(f) The compact waste disposal facility license holder may request an amendment to increase the overall capacity of the federal facility waste disposal facility on or after the fifth anniversary of the date the license holder begins disposing of federal facility waste. An amendment under this subsection may authorize only an increase in the total volume of uncontainerized Class A low-level radioactive waste that may be accepted at the federal facility waste disposal facility.

(g) The department may authorize an increase under Subsection (f) if the total volume of uncontainerized Class A low-level radioactive waste over the projected life of the federal facility waste disposal facility will be 4,985,000 cubic yards or less.

(h) Before authorizing an amendment under Subsection (f), the department shall:

(1) perform a needs assessment for expanding the overall capacity of uncontainerized Class A low-level radioactive waste;

(2) analyze the waste characteristics of the additional uncontainerized Class A low-level radioactive waste the amendment would permit;

(3) perform an impact assessment based on the proposed increase in capacity, including the potential impact on compact waste accepted at the compact waste disposal facility;

(4) examine the compliance history of the compact waste disposal facility license holder; and

(5) hold a public hearing on the amendment.
