

LEGISLATIVE BUDGET BOARD
Austin, Texas

FISCAL NOTE, 78TH LEGISLATIVE REGULAR SESSION

April 18, 2003

TO: Honorable Troy Fraser, Chair, Senate Committee on Business & Commerce

FROM: John Keel, Director, Legislative Budget Board

IN RE: HB802 by Geren (Relating to the number and location information requirements provided by business phones in certain 9-1-1 emergency communication districts.), **As Engrossed**

No fiscal implication to the State is anticipated.

The substitute bill exempts state agencies from the Act. The bill would require a business service user that owns or leases a publicly or privately owned telephone switch used to provide telephone services to non-affiliated businesses to furnish for each 9-1-1 call the telephone number of the subscriber and the address associated with the number (Automatic Location Identification). Additionally, the bill requires a business service user that owns or leases a publicly or privately owned telephone switch used to consolidate telephone services at two or more physical addresses to provide a level of service that identifies an accurate physical address and telephone number for each 9-1-1 call. The bill specifies that each floor of a multi-tenant building is considered a different physical address and a hotel, motel, or lodging facility must use a system that furnishes a telephone number and location of the individual unit if the facility does not operate with a 24-hour, seven-day on-site telephone operator. The substituted bill does not apply to a telecommunications system installed by a public school district or a state agency and applies to a telecommunications system installed on or after September 1, 2003. The Act takes effect September 1, 2003.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
