

LEGISLATIVE BUDGET BOARD
Austin, Texas

FISCAL NOTE, 79TH LEGISLATURE 3rd CALLED SESSION - 2006

May 4, 2006

TO: Honorable Jerry Madden, Chair, House Committee on Corrections

FROM: John S. O'Brien, Deputy Director, Legislative Budget Board

IN RE: HB87 by Madden (Relating to the capacity of certain correctional facilities operated under contracts between the Texas Board of Criminal Justice and a private vendor or county commissioners court.), **As Introduced**

No significant fiscal implication to the State is anticipated.

The bill would amend Government Code provisions prescribing the capacity of certain correctional facilities operated under contracts by the Texas Board of Criminal Justice with a private vendor or county commissioners' court. The bill would change the maximum allowable average daily inmate population at a contract facility from 1,000 to 1,200, and would change the total maximum allowable contracted beds from 4,580 to 4,780.

This fiscal note assumes that Chapter 495 of the Government Code applies only to state-owned privately operated prison beds, and excludes privately operated state jails and temporary leased beds. Any expansion of bed space would require an analysis of the existing facilities where growth would occur to verify that the capacity increase would be in compliance with the standards for prison populations established by Chapter 499, Government Code. Any potential savings would also be affected by the costs to expand the bed capacity. This analysis assumes that the beds would be added to the permanent operating capacity of the Texas Department of Criminal Justice (TDCJ) and would reduce the need for contracted temporary capacity.

Assuming that TDCJ continues to contract for temporary leased beds throughout the 2008-09 biennium and that 200 beds could be added to current capacity, the potential annual savings would be \$494,210 per fiscal year. The potential cost savings is calculated by multiplying 200 beds by 365 days by an average daily savings of \$6.77 (average daily cost of temporary leased bed of \$39.96 - (\$28.75 average daily cost for a privately operated prison bed + \$4.44 average daily medical cost) = \$6.77).

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
