AUTHOR'S/SPONSOR'S STATEMENT OF INTENT

A state insurance program was created for public school employees in 2001, but not all public schools participate in the program. While the commissioner of education held in a formal ruling that school districts that do not participate in the state plan must make at least one health plan available that provides portability of coverage, it is not clear that all health plans provided by school districts must provide portability of coverage. S.B. 1448 ensures universal portability of coverage for all public school employees, an objective that was initiated with the establishment of the state plan in 2001.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
