

## **BILL ANALYSIS**

S.B. 1583  
By: Zaffirini  
Public Education  
Committee Report (Unamended)

### **BACKGROUND AND PURPOSE**

In order to enroll in school in Texas, a student must be immunized and the immunization record must be placed on file with the school district. Many children do not have their immunizations updated promptly simply because they and their parents are not aware that this needs to be done. Children who are not vaccinated pose a health risk not only to themselves, but also to other children attending school with them.

S.B. 1583 requires that, before students are released for summer vacation, school nurses or other administrative officials present every student with a sheet indicating whether the student's immunizations are up to date. In addition, the name and contact information of a local clinic where the student can receive the necessary immunizations will be provided. The sheet may also contain additional information about the importance of regular immunizations as well as a list of available vaccines and the diseases they prevent.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
