Fiscal Analysis

The bill establishes the Governor's Health Care Coordinating Council in the Office of the Governor. The bill requires the council to identify and study problems in the health care system and identify possible solutions for the state or other participants in the system.

The bill requires the council to submit a report of its findings and recommendations to the governor, lieutenant governor, and speaker of the house of representatives not later than December 31 of each even-numbered year.

The bill also requires the council to facilitate and promote the use of technology in the health care system, research and promote initiatives relating to patient safety, and establish a clearinghouse of information to assist communities in assessing the needs of local health care systems.

The bill requires the council to hire an executive director and authorizes the director to hire staff. The bill requires the director to prepare a personnel policy statement.

Methodology

The bill requires the council to hire an executive director and authorizes the director to hire staff. This would result in an increase of three FTEs (Program Director I, Program Specialist II, and an Administrative Assistant III) to identify, research and conduct studies on problems related to the health care system. Combined salaries for these three FTEs would be \$160,000 per fiscal year. Travel expenditures associated with the council meetings and staff travel are estimated at \$32,000 per fiscal year and other operating expenses are estimated at \$8,460 per fiscal year. For fiscal year 2006 and fiscal year 2009, a \$4,500 cost is anticipated for three personal computers.

Local Government Impact

No fiscal implication to units of local government is anticipated.
