Fiscal Analysis

The bill would authorize the issuance of \$2.7 billion in tuition revenue bonds for institutions of higher education to finance construction and improvement of infrastructure and related facilities. The bill includes authorization of \$1,112 million for the University of Texas System, \$683 million for the Texas A&M System, \$158 million for the University of Houston System, \$242 million for the Texas State University System, \$136 million for the University of North Texas System, \$89.75 million for the Texas Tech University System and \$230 million for independent institutions. The tuition revenue bond debt service would have a biennial cost of \$459,661,380 for fiscal years 2006-2007.

The bonds would be payable from pledged revenue plus tuition. The bonds would not be general obligations of the State. However, the issued bonds would have fiscal implications for the State. Although tuition income is pledged against the bonds, historically the Legislature has appropriated

General Revenue to reimburse institutions for the tuition used to pay the debt service. This note assumes the Legislature would continue this policy.
