**Fiscal Analysis**

The bill would authorize the issuance of a maximum of \$50,000,000 in revenue bonds by the University of Texas System for the University of Texas at San Antonio to finance capital improvements including a Downtown Campus Architecture Building.

The bonds would be payable from pledged revenue plus tuition. The bonds would not be general obligations of the State. However, the issued bonds would have fiscal implications for the State. Although tuition income is pledged against the bonds, historically the Legislature has appropriated general revenue to reimburse institutions for the tuition used to pay the debt service. This policy is assumed to continue.

**Methodology**

It is assumed the bonds would be issued on September 1, 2005, at a 6 percent interest rate with a 20-year debt service amortization. Based on calculations prepared by the University of Texas System, the amount of debt service payments would be \$4,359,228 each year. The total estimated amount of debt service (principal and interest) from fiscal year 2006 to fiscal year 2025 is estimated to be \$87,184,560.

### **Local Government Impact**

No fiscal implication to units of local government is anticipated.
