Fiscal Analysis

The bill would require a state agency that provides wireless Internet access on state property to prohibit wireless access to obscene materials. The bill requires the Department of Information Resources (DIR) to assist a state agency in prohibiting wireless access to obscene materials, including prohibiting access by using a filter or other software. The bill prohibits wireless access to obscene materials at a correctional facility. The bill would take effect September 1, 2005.

Methodology

The bill requires the Department of Information Resources (DIR) to assist a state agency in prohibiting, wireless access to obscene materials, including prohibiting access by using a filter or other software. This analysis assumes that DIR will act in an advisory capacity to state agencies, and will

require 1 FTE to fulfill this requirement. Estimated costs for this FTE include \$50,000 in annual salary and \$4,500 in travel costs. It is estimated that the purchase of filters or other software could be absorbed within current state agencies' budgets.

Technology

State agencies that provide wireless Internet access would be required to purchase a filter or other software to prevent access to obscene material.

Local Government Impact

No significant fiscal implication to units of local government is anticipated. The bill authorizes a county sheriff to ban or filter wireless access to obscene materials in the county jail.
