

LEGISLATIVE BUDGET BOARD
Austin, Texas

FISCAL NOTE, 79TH LEGISLATIVE REGULAR SESSION

April 6, 2005

TO: Honorable Florence Shapiro, Chair, Senate Committee on Education

FROM: John S. O'Brien, Deputy Director, Legislative Budget Board

IN RE: SB474 by Barrientos (Relating to safety regulations for certain extracurricular school activities.), **As Introduced**

| |
|---|
| No significant fiscal implication to the State is anticipated. |
|---|

The bill would require the commissioner of education to develop and adopt a safety training program applicable to all schools in the state subject to University Interscholastic League (UIL) regulations. The Texas Education Agency would incur a one-time cost of approximately \$50,000 in fiscal year 2006 for contracted services to develop the safety program.

The bill would require all coaches, trainers, sponsors, marching band directors, and certain physicians who assist with extracurricular athletic activities to complete safety training annually. The bill would also require that each student participating in an extracurricular activity receive safety training and that schools provide a copy of Sections 33.201-207, Education Code to each participating student and their parent or guardian.

The bill would require each school district to make an automated external defibrillator available at each UIL athletic practice or competition.

The bill would take effect September 1, 2005 and would apply beginning with the 2006-07 school year, except the provisions within the proposed Section 33.204, Education Code, which would apply beginning with the 2005-06 school year.

Local Government Impact

School districts would be required to provide annual safety training to all coaches, trainers, sponsors, marching band directors, and certain physicians who assist with UIL extracurricular athletic activities. The safety training for staff could approach \$554,000 annually for local school districts statewide. Districts would also be required to provide student safety training and to supply each student and parent or guardian with a copy of Sections 33.201-207, Education Code; these requirements are anticipated to be insignificant on a statewide basis.

School districts would be required to make an automated external defibrillator (AED) available at each UIL athletic practice or competition. Based on the assumption that the average cost of an AED unit would be \$1,500, one-time costs for equipment purchases in fiscal year 2006 would range from \$13.6 to \$21.6 million statewide. According to the Texas Education Agency, ongoing costs for periodic maintenance and testing of the units could amount to approximately \$68,000 to \$108,000 annually in fiscal years 2007-10.
