### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Currently there is no nurse-family partnership program in Texas. Nurse-family partnership programs, however, have existed for 23 years in 22 states, serving over 20,000 mothers. The programs focus on improved pregnancy outcomes, child health and development, and the economic self sufficiency of the family. Statistics for programs in other states show benefits to both children and mothers. For example, statistics have shown a 48 percent reduction in child abuse and neglect, 59 percent reduction in arrests, and a 90 percent reduction in adjudications. Benefits to mothers include 61 percent fewer arrests, 72 percent fewer convictions, and 98 percent fewer days spent in jail. For every one dollar spent by the state on these programs, long-term savings of between four and five dollars have been shown.

S.B. 156 implements the nurse-family partnership program, a nurse home visitation program, in 11 new sites across Texas. The program is an evidence-based nurse home visitation program that improves the health and well-being of low income first-time parents and their children. The program will include regular home visits by qualified nurses to participant mothers from pregnancy to age two and requires eligible participant mothers to enter the program not later than the 28th week of pregnancy. This bill authorizes a public or private entity, including a county, municipality, or other political subdivision of Texas, to apply to the Health and Human Services Commission (HHSC) for a grant under this subchapter. Sites will be chosen based on the number of low income, first-time mothers residing in the community, and a demonstrated need for a partnership program. Grant recipients will be required to participate in ongoing monitoring and performance evaluations and in community development support for the program. In addition, this bill authorizes the Greater Dallas YWCA which has been operating a pilot program of the Nurse-Family Partnership for the past year-and-a-half to participate in the grant program. Such funds will be used for administrative costs, salaries, training, and facilities. S.B. 156 requires HHSC to work with the Nurse-Family Partnership National Service Office to adopt standards for the program and performance measurement indicators for the evaluation of each site.

### **RULEMAKING AUTHORITY**
