### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Under current law, counties are authorized to use pass-through financing agreements, which allow for public or private entities to construct state highway projects and receive payment from the Texas Department of Transportation (TxDOT) following the completion of the project. TxDOT provides a stream of revenue to the participating municipality to secure and repay bonds issued by the county in financing said projects. Providing this same authority to municipalities might provide a way for municipalities to move forward with transportation projects knowing that the costs will be repaid over time, which may accelerate the financing and completion of those projects.

S.B. 1536 authorizes municipalities to issue bonds to finance a non-toll project or facility on the state highway system located in the municipality or as a continuation of the project or facility in an adjacent jurisdiction.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
