

By: West, Van de Putte

S.R. No. 777

SENATE RESOLUTION

WHEREAS, Chronic obstructive pulmonary disease, also known as chronic bronchitis and emphysema, is the fourth-leading cause of death in the United States and the only one of the top five causes whose prevalence and death rate are rising; and

WHEREAS, Chronic obstructive pulmonary disease is a progressive disease that potentially impacts more than 24 million Americans; and

WHEREAS, The annual cost to the nation for chronic obstructive pulmonary disease in 2004 was estimated to be approximately \$37 billion; and

WHEREAS, Early diagnosis and management of chronic obstructive pulmonary disease can effectively reduce the overall financial burden of the illness on public programs such as Medicaid; and

WHEREAS, Proper management of chronic obstructive pulmonary disease can lead to improved quality of life and self-sufficiency on the part of patients cared for within public programs; now, therefore, be it

RESOLVED, That the Senate of the State of Texas, 80th Legislature, hereby encourage the Texas Health and Human Services Commission to consider partnering with private entities to provide education on chronic obstructive pulmonary disease to Medicaid providers and recipients in an effort to reduce the

S.R. No. 777

financial and clinical burden of chronic obstructive pulmonary disease upon the Medicaid program and the citizens of Texas.

President of the Senate

I hereby certify that the above Resolution was adopted by the Senate on May 22, 2007.

Secretary of the Senate
