#### **Fiscal Analysis**

The bill would amend the Utilities Code to add two commissioners to the Public Utility Commission and change certain eligibility requirements to serve as a commissioner or executive director.

This bill would take effect September 1, 2007.

#### Methodology

Based on the analysis of the Public Utility Commission (PUC), it is assumed that there would be costs associated with employing two additional commissioners, two additional executive assistants, and two additional program specialists, including office renovations and purchasing additional furniture and

equipment.

The PUC currently employs one executive assistant and one program specialist for each commissioner and reports that some additional renovation costs would be necessary to expand its facilities to accommodate the two additional commissioners. It is estimated that the PUC will incur General Revenue costs for additional staff of \$400,830 and 6.0 FTEs through fiscal year 2012. Other costs and operating expenses are estimated to be at \$447,751 in fiscal year 2008 and at \$87,751 through 2012. Associated benefits are estimated to be \$113,395 through 2012.

### **Local Government Impact**

No fiscal implication to units of local government is anticipated.
