Fiscal Analysis

The bill would extend a pilot program to reduce tuition rates for the 2008 summer term at Texas A&M University. The pilot program would expire January 1, 2009.

Methodology

Based on analysis by the Texas Higher Education Coordinating Board, it is estimated that 12,519 full-time students would be eligible for reduced tuition. The Higher Education Coordinating Board estimates a total of 92,492 hours would be generated in fiscal year 2008. The reimbursement rate for

the state would be \$12.50 per hour in statutory tuition and is estimated to be \$59.50 per hour in designated tuition. The tuition reimbursement cost for fiscal year 2008 would be \$6,659,420.

Based on the following language already in Education Code, “This section applies only if the legislature specifically appropriates money to cover the tuition revenue lost,” it is assumed that an equivalent amount of general revenue funds would be needed to reimburse the university for the loss of both appropriated and designated tuition revenue.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
