**Fiscal Analysis**

The bill would authorize a licensed dentist to delegate to a qualified and trained dental assistant certain procedures, including coronal polishing and the application of pit and fissure sealant. The bill would require the Texas State Board of Dental Examiners to issue a certification to eligible dental assistants to perform these additional duties.

The bill would take effect September 1, 2009.

**Methodology**

The Texas State Board of Dental Examiners estimates that 10,000 dental assistants would apply for this certification.

Based on information provided by the Texas State Board of Dental Examiners, it is assumed that changes to the license database at a one-time cost of \$10,132 would be required to accommodate new certifications.

This analysis assumes that any increased costs to the agency, which is statutorily required to generate sufficient revenue to cover its costs of operation, would be offset by an increase in fee generated revenue.

### **Technology**

Programming costs are estimated to be 122 hours at \$83.05 per hour. These costs include analysis, adding new fields to the database, setting up the application screen, modifying the renewal program for certificate changes, testing and modifying the TexasOnline interfaces. These estimates are provided by the agency's current contractor for the database.

### **Local Government Impact**

No fiscal implication to units of local government is anticipated.
