Fiscal Analysis

The bill would create the Texas Export Financial Assistance Guarantee Program within the Texas Economic Development and Tourism Office at the Trusted Programs Within the Office of the Governor. The program would guarantee a portion of loans made by participating financial institutions to certain manufacturers to facilitate the manufacture of certain products in Texas for international export. Preferred manufacturing industries would include alternative energies, medical goods, green technologies, high fuel efficiency vehicles, water conservation and purification technologies, and scientific goods.

In order to obtain a loan guarantee, a manufacturer would have to meet experience and financial requirements and conditions specified in the bill. A manufacturer could use the funding only to

finance the costs of manufacturing in this state a product for international export. Under the program, a participating financial institution would apply for a loan guarantee with the Office for an eligible loan. The bill would allow the state to guarantee up to 50 percent of the amount of an eligible loan, or in special circumstances up to 80 percent.

Every six months, a participating financial institution would pay to the Office a 25-basis-point fee applied to the outstanding balance of the state's guaranteed portion of loans made by the financial institution under the program.

The bill would require the Office to determine criteria for a financial institution to apply for loan guarantees. The office would also be required to perform an annual audit and submit biennial reports to the legislature.

The bill would be effective immediately if it receives a vote of two-thirds or on September 1, 2009.

Methodology

This legislation would do one or more of the following: create or recreate a dedicated account in the General Revenue Fund, create or recreate a special or trust fund either with or outside of the Treasury, or create a dedicated revenue source. The fund, account, or revenue dedication included in this bill would be subject to funds consolidation review by the current Legislature. The bill would limit the amount appropriated by the legislature to not exceed \$100,000,000 per biennium. The revenue source to the new GR-dedicated account would consist of a transfer from the General Revenue Fund. It is assumed that amounts necessary for administrative costs would not be transferred to the new GR-dedicated account.

It is assumed that the Truusted Programs Within the Office of the Governor would require three new employees in order to oversee the Texas Export Financial Assistance Guarantee Program at a cost of \$138,726 per fiscal year for salaries and wages and \$39,634 per fiscal year for benefits out of General Revenue. In addition, one-time cost of \$10,995 for equipment such as computer, desks, and telephones in fiscal year 2010 and on-going costs including travel and other operating expenses of \$4,539 per fiscal year would be needed. In addition, the Truusted Programs Within the Office of the Governor indicates that there would be a need for outside financial and legal assistance in the amount of \$100,000 per fiscal year.

In addition, every six months, a participating financial institution would pay to the Office a 25-basis-point fee applied to the outstanding balance of the state's guaranteed portion of loans made by the financial institution under the program. The amount this fee would generate cannot be determined.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
