Fiscal Analysis

The bill would amend the Insurance Code relating to the operations of the Texas Department of Insurance (TDI) and continue the agency until September 1, 2021.

The bill would require TDI to develop a policy that encourages the use of negotiated rulemaking and alternative dispute resolution (ADR), as well as designate a trained person to coordinate the TDI's ADR efforts. The bill would require TDI to issue certificates of authority to preferred provider organizations (PPOs) operating in Texas and authorizes TDI to charge a fee for the application. Additionally the bill would require TDI to collect and publish certain information relating to the processing of personal automobile and residential property claims and to regularly examine title agents. The bill would set a 30-day time limit for TDI to review and administratively disapprove a property and casualty insurance rate under the file-and-use system. The bill would expand the responsibilities of the State Fire Marshal's Office (SFMO), housed at TDI, and authorize the SFMO to charge a fee for inspections of privately owned buildings. Based on the analysis by the Sunset Commission and TDI, the costs of implementing these provisions of the bill, listed above, could be absorbed within existing resources.

The bill would transfer the windstorm inspection program from TDI to the Texas Windstorm Inspection Association, which would result in a reduction of \$1,610,740, due to staffing reductions of 28 FTEs and the elimination of the windstorm field offices. This program is partially funded from approximately \$1 million deposited in Fund 36 annually in investment income from the Catastrophe Reserve Trust Fund (CRTF) to subsidize inspections. The bill would eliminate the transfer, leaving the funding in the CRTF.

The bill would take effect on September 1, 2009.

Methodology

Based on analysis from the Sunset Advisory Commission and TDI, the reduction of 28 FTEs in FY 2010-2014 would decrease costs to TDI in the amount of \$1,297,573 for salaries and associated costs. Additionally, the reduction in FTEs would decrease benefits costs to the state by \$313,167 in FY2010-2014.

Since TDI is required to generate revenues equivalent to its costs of operation under current law, this analysis assumes that any savings realized would remain in the fund or the maintenance tax would be set to recover a lower level of revenue the following year.

Technology

No technology impact is anticipated.

Local Government Impact

No fiscal implication to units of local government is anticipated.
