### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Medicaid assures medical transportation for nonemergency medical needs. When Medicaid Transportation was initially created, it was administered by the Texas Department of Transportation. More recently, the program has been transferred and administered by the Health and Human Services Commission (HHSC).

Regional contracted brokers provide transportation to Medicaid recipients to access nonemergency medical transportation program. These regional contracted brokers act as a taxi service to help persons get to doctors appointments and access other nonemergency medical services. H.B. 2136 seeks to protect these brokers and the persons they serve by authorizing the executive of HHSC to adopt rules to ensure the safe and efficient provision of nonemergency transportation services under the medical transportation program.

H.B. 2136 would assure that a medical transportation provider meets certain standards to assure the health and safety of some very vulnerable populations.

Ambulances are specifically excluded from the nonmedical emergency transportation requirements because those who operate ambulances must already undergo more rigorous training and certification requirements.

H.B. 2136 ensure that basic public safety needs for all Medicaid patients across the state are met by medical transportation providers who contract with HHSC.

H.B. 2136 amends current law relating to regional contracted brokers and subcontractors of regional contracted brokers providing Medicaid nonemergency medical transportation services.
