### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Subchapter B (Subdivision Platting Requirements in County Near International Border), Chapter 232 (County Regulation of Subdivisions), Local Government Code, relates predominantly to counties that are located along the Texas-Mexico Border, which have been mandated since the passage of H.B. 1001, in 1995, to adopt certain land development requirements meant to prevent the proliferation of colonias, i.e., platting and water and wastewater requirements. These regulations are known as the Model Subdivision Rules promulgated by the Texas Water Development Board.

During the interim, the Senate Committee on International Relations and Trade held meetings and hearings regarding the effectiveness of the Model Subdivision Rules. By meeting with various stakeholders and overseeing agencies, the committee found that instances exist in which some would-be land buyers, such as those buying land in sheriff auctions, are not being made aware of the platting and water and wastewater requirements set forth by the Model Subdivision Rules. In certain circumstances, this has resulted in unintentional violations of the law in certain land-sale transactions (those involving less than five acres where Texas law presume the land to be intended for residential use).

S.B. 1760 amends current law relating to notice of water and wastewater requirements before certain sales of certain residential properties.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
