

**LEGISLATIVE BUDGET BOARD**  
**Austin, Texas**

**FISCAL NOTE, 82ND LEGISLATIVE REGULAR SESSION**

**March 7, 2011**

**TO:** Honorable John Carona, Chair, Senate Committee on Business & Commerce

**FROM:** John S O'Brien, Director, Legislative Budget Board

**IN RE: SB773** by Zaffirini (Relating to telecommunications service discounts for educational institutions, libraries, hospitals, and telemedicine centers.), **As Introduced**

There is an indeterminate savings to the state from the provisions of this bill because it would continue the prohibition on rate increases for private network services, the provision of discounted rates for private network services, and other benefits currently provided to educational institutions, libraries, hospitals and telemedicine centers under Chapters 58 and 59 of the Utilities Code.

The bill would amend the Utilities Code to continue the prohibition on rate increases for private network services, the provision of discounted rates for private network services, and other benefits currently provided to educational institutions, libraries, hospitals and telemedicine centers under Chapters 58 and 59 of the Utilities Code for another 12 years through January 1, 2024.

The exact savings due to implementing the provisions of the bill cannot be determined because the fiscal impact would depend on the actions of telecommunications service providers in setting rates. Since the potential increased costs would vary by entity if the date on which the benefits provided in Chapters 58 and 59 are set to expire were not changed by the bill, savings to the state cannot be determined.

Information reported by The University of Texas anticipates cost savings of \$15.1 million dollars annually from the continuation of benefits under Chapters 58 and 59 provided by the bill.

**Local Government Impact**

It is anticipated that there would be an indeterminate savings to local governmental entities that are currently benefitting from provisions in Chapter 58 and 59. However, the amount of savings due to implementing the provisions of the bill cannot be determined because the fiscal impact would depend on the actions of telecommunications service providers in setting rates. Since the potential increased costs would vary by entity if the date on which the benefits provided in Chapters 58 and 59 are set to expire were not changed by the bill, savings to local entities cannot be determined.
