AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

The distilled spirits industry in Texas has seen tremendous growth over the last decade. In 2004, Texas issued three distiller's and rectifier's permits. Today, 43 liquor distilleries hold active distiller's and rectifier's permits in Texas. The Texas distilled spirits industry has the potential for even more growth if the state modifies its current regulatory system.

Currently, a Texas distillery cannot sell its product to the ultimate consumer without utilizing the three-tier system. S.B. 905 is modeled after the current exceptions to the three-tier system for Texas wineries and will help expose more consumers to new and innovative distilled spirits products.

S.B. 905 allows a Texas distiller to sell the distiller's product to the ultimate consumer for off-premise consumption up to 3,500 gallons annually, with some restrictions. S.B. 905 also allows a distiller to have on-premise sales of distilled spirits up to 3,000 gallons annually.

S.B. 905 amends current law relating to the sale of distilled spirits to ultimate consumers by the holder of a distiller's and rectifier's permit.

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
