AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

School personnel are currently provided with little or no training in how to respond to an active shooter situation, and the curriculum required to receive a concealed handgun license (CHL) does not cover an appropriate response to an active shooter. S.B. 1857 creates a school safety certification for CHL instructors to train school personnel in basic defensive tactics to better equip them to protect their classrooms in dangerous situations.

This approach will utilize an infrastructure that is already in place, with over 3,000 CHL instructors statewide. If approved by the school, the training may take place on campus to increase familiarity with each teacher's unique environment. This training can better prepare the employee for an active shooter scenario whether they are carrying a weapon or not.

As proposed, S.B. 1857 amends current law relating to the training of certain qualified handgun instructors to conduct school safety training.
