AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

In 2005, school districts across the State of Texas compressed their maintenance and operations (M&O) tax rates to two-thirds their original levy under the then-newly created school finance system.

As a result, school districts are not permitted to maximize their rate of return earned as a result of the district's statutorily defined compressed tax rate (CTR) if the CTR is below the maximum compressed tax rate (MCR), currently set at \$1.00 of tax effort. This is commonly known as "fractional funding," since the CTR of a district is a "fraction" of the MCR.

Under S.B. 945, a school district under fractional funding would be allowed to convert existing "copper pennies" generated under Section 41.002(a)(3) (currently yielding \$31.95) into "Tier 1 Pennies," which generate a higher yield as a result of being tied to the Basic Allotment. A district would be allowed to convert as many "copper pennies" as applicable until the district's CTR is equal to the MCR.

Under S.B. 945, if a school district chooses to participate in the transfer, a larger amount of state funding will be realized by the school district utilizing the district's existing tax effort rate. If a school district chose to participate, they would be required to notify the commissioner of education in writing not later than September 1 of the affected school year.

As proposed, S.B. 945 amends current law relating to funding under the public school finance system for a school district with a compressed tax rate below the state maximum compressed tax rate.
