## TEXAS TRAFFIC SAFETY TASK FORCE REPORT

Commissioner Jeff Moseley, Texas Transportation Commission

# Texas Transportation Commission

125 EAST 11TH STREET • AUSTIN, TEXAS 78701-2483

June 30, 2016

Every year more than 3,500 people die on Texas roads. That is equivalent to ten fully loaded 747s crashing with every passenger on board dying. When it comes to the horrific number of fatalities on Texas roadways, everyone agrees with the statement, "WE CAN DO BETTER!"

I am proud to serve as a member of the Texas Transportation Commission, overseeing one of the finest transportation systems in the world. Commission Chairman Tryon Lewis asked me to develop a plan to reduce serious injuries and deaths on Texas roadways. To identify solutions, I called upon Texas Department of Transportation professionals, as well as representatives from a wide variety of transportation-related organizations, including the Texas Department of Public Safety and the Texas A&M Transportation Institute to create the Texas Traffic Safety Task Force.

We have reams of data about deaths and crashes on our roadway system. We know the causes of these deaths and crashes, and you do too — speeding, running off the road, driving under the influence, distracted driving or not wearing safety belts.

The good news is that we also have data proving how to reduce deaths and crashes. We know this, because in the past 50 years, safer roads, safer cars and better educated drivers have resulted in a 35 percent reduction in traffic fatalities in the United States, even with more vehicles on the roads.

Highway safety engineering improvements include rumble strips, median barriers and improvements at intersections, to name a few. Awareness campaigns and increased enforcement can address the many choices drivers make — like buckling up, putting down cell phones, using the left lane for passing only, and stopping the stupid choice of drinking and driving.

Simply put: highway safety engineering improvements combined with altering driver behavior can reduce crashes and save lives.

More life-saving highway safety engineering, driver education and enforcement programs require more investment in our transportation system. This report directly speaks to the cost of these measures and the benefit of reducing death and injuries as a "RETURN ON INVESTMENT".

Please imagine thousands of Texans, including our own family members and friends, who, as a result of spending money on these safety tools, will no longer be crash or death statistics, but will arrive at their destinations safely. These results are, indeed, a magnificent "RETURN ON INVESTMENT".

Please take time to review **Solutions for Saving Lives on Texas Roads** and see if you agree that it is time to fight for safer Texas roadways.

Sincerely,

Jeff Moseley

# EXECUTIVE SUMMARY - JUNE 2016

The Texas Department of Transportation's (TxDOT) Crash Records Information System, known as CRIS, generates detailed crash data used to determine crash emphasis areas, which are the factors that contribute to traffic crashes. Law enforcement agencies across Texas submit crash reports to CRIS. With nearly 90 percent of crash reports now submitted electronically, TxDOT delivers accurate, timely and comprehensive data.

TxDOT focuses on crash emphasis areas and works to reduce the number of crashes with highway safety engineering and driver behavior education and enforcement. Based on past successes, transportation professionals know that these traffic safety improvements can reduce serious crashes and deaths on Texas roadways.

## The 3 Es of Traffic Safety: Engineering Education Enforcement

In 2015, Texas recorded 16,788 fatal and serious injury crashes that resulted in 3,538 deaths. These fatal and serious injury crashes included 5,952 intersection-related

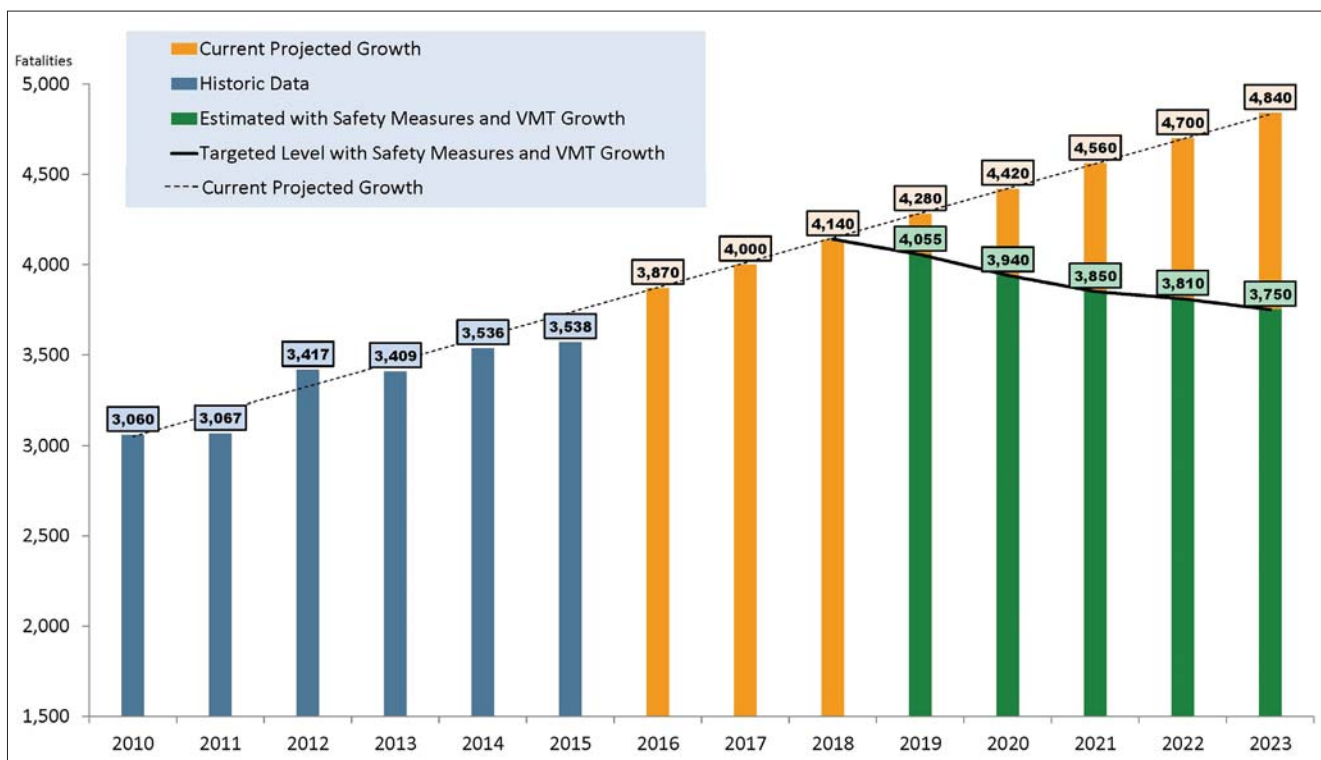

crashes, 5,274 run-off-the-road crashes, and 3,010 crashes involving driving under the influence. Sixty percent of crashes causing death or serious injuries occurred in urban areas and 40 percent in rural areas.

## Fatal and Serious Injury Crashes

Urban 60%  
Rural 40%

"Fatalities on Texas Roadways" [Figure 1] shows fatalities are projected to increase to 4,840 by 2023. An integrated effort using proven highway safety engineering and driver behavior education and enforcement is needed to reverse this trend. If TxDOT, in cooperation with other state and local stakeholders, installs the recommended safety improvements and implements the driver behavior education and enforcement included in this report, the anticipated number of fatalities on Texas roadways could be reduced to a targeted level of 3,800 fatalities or fewer in 2023. [Figure 1] Thousands of lives could be saved, despite expected increases in population and vehicle miles traveled (VMT).

## TEXAS TRAFFIC SAFETY TASK FORCE EXECUTIVE SUMMARY

The Texas Transportation Commission is committed to traffic safety and reducing the number of deaths and crashes on Texas roadways. The Commission established the Texas Traffic Safety Task Force, which includes Texas transportation and law enforcement professionals representing a wide variety of transportation-related organizations. The Texas Traffic Safety Task Force worked to identify best practices recommendations and new ideas in an effort to reduce Texas highway fatalities, injuries and crashes.

**More than 540 lives could be saved and thousands of crashes prevented every year at an average annual investment of \$540 million.**

The Texas Traffic Safety Task Force builds on a legacy established during the 78th Texas Legislative Session in 2003 to prioritize traffic safety when considering funding of highway improvement projects through the Highway Safety Bond Program. Senator Steve Ogden sponsored HB 3588, which gave Texas voters the opportunity to pass a constitutional amendment to issue \$3 billion in revenue bonds for the construction of highway improvement projects. Senator Ogden championed the concept of prioritizing traffic safety by specifying that 20 percent of the \$3 billion in bonds would be dedicated to traffic safety improvement projects. Before and after crash data determined that hundreds of lives were saved as a result of the Highway Safety Bond Program, despite increases in population and vehicle miles traveled. [Figure 2] As we continue to seek ways to reduce crashes and injuries and to save lives, the quantifiable reductions in fatalities on Texas roadways resulting from the installed safety improvements during the Highway Safety Bond Program serve as a guide for these recommendations.

The Texas Traffic Safety Task Force recommendations, which focus on highway safety engineering, include installation of concrete and cable median barriers, rumble strips, urban intersection improvements, high-friction surface treatment on curves, highway and bridge widenings, and Traffic Management Systems. In addition,

**Texas could potentially reap up to \$12 for every \$1 spent on these safety strategies, which can continue preventing crashes and deaths for up to 20 years.**

the number of Texas crashes with driver behavior as a contributing factor remains very high. The Texas Traffic Safety Task Force recommendations for driver behavior education and enforcement include expanding Texas driver safety education and outreach campaigns geared toward impaired driving, teen drivers, safety belt use, distracted driving, motorcyclists, pedestrians and work zone safety.

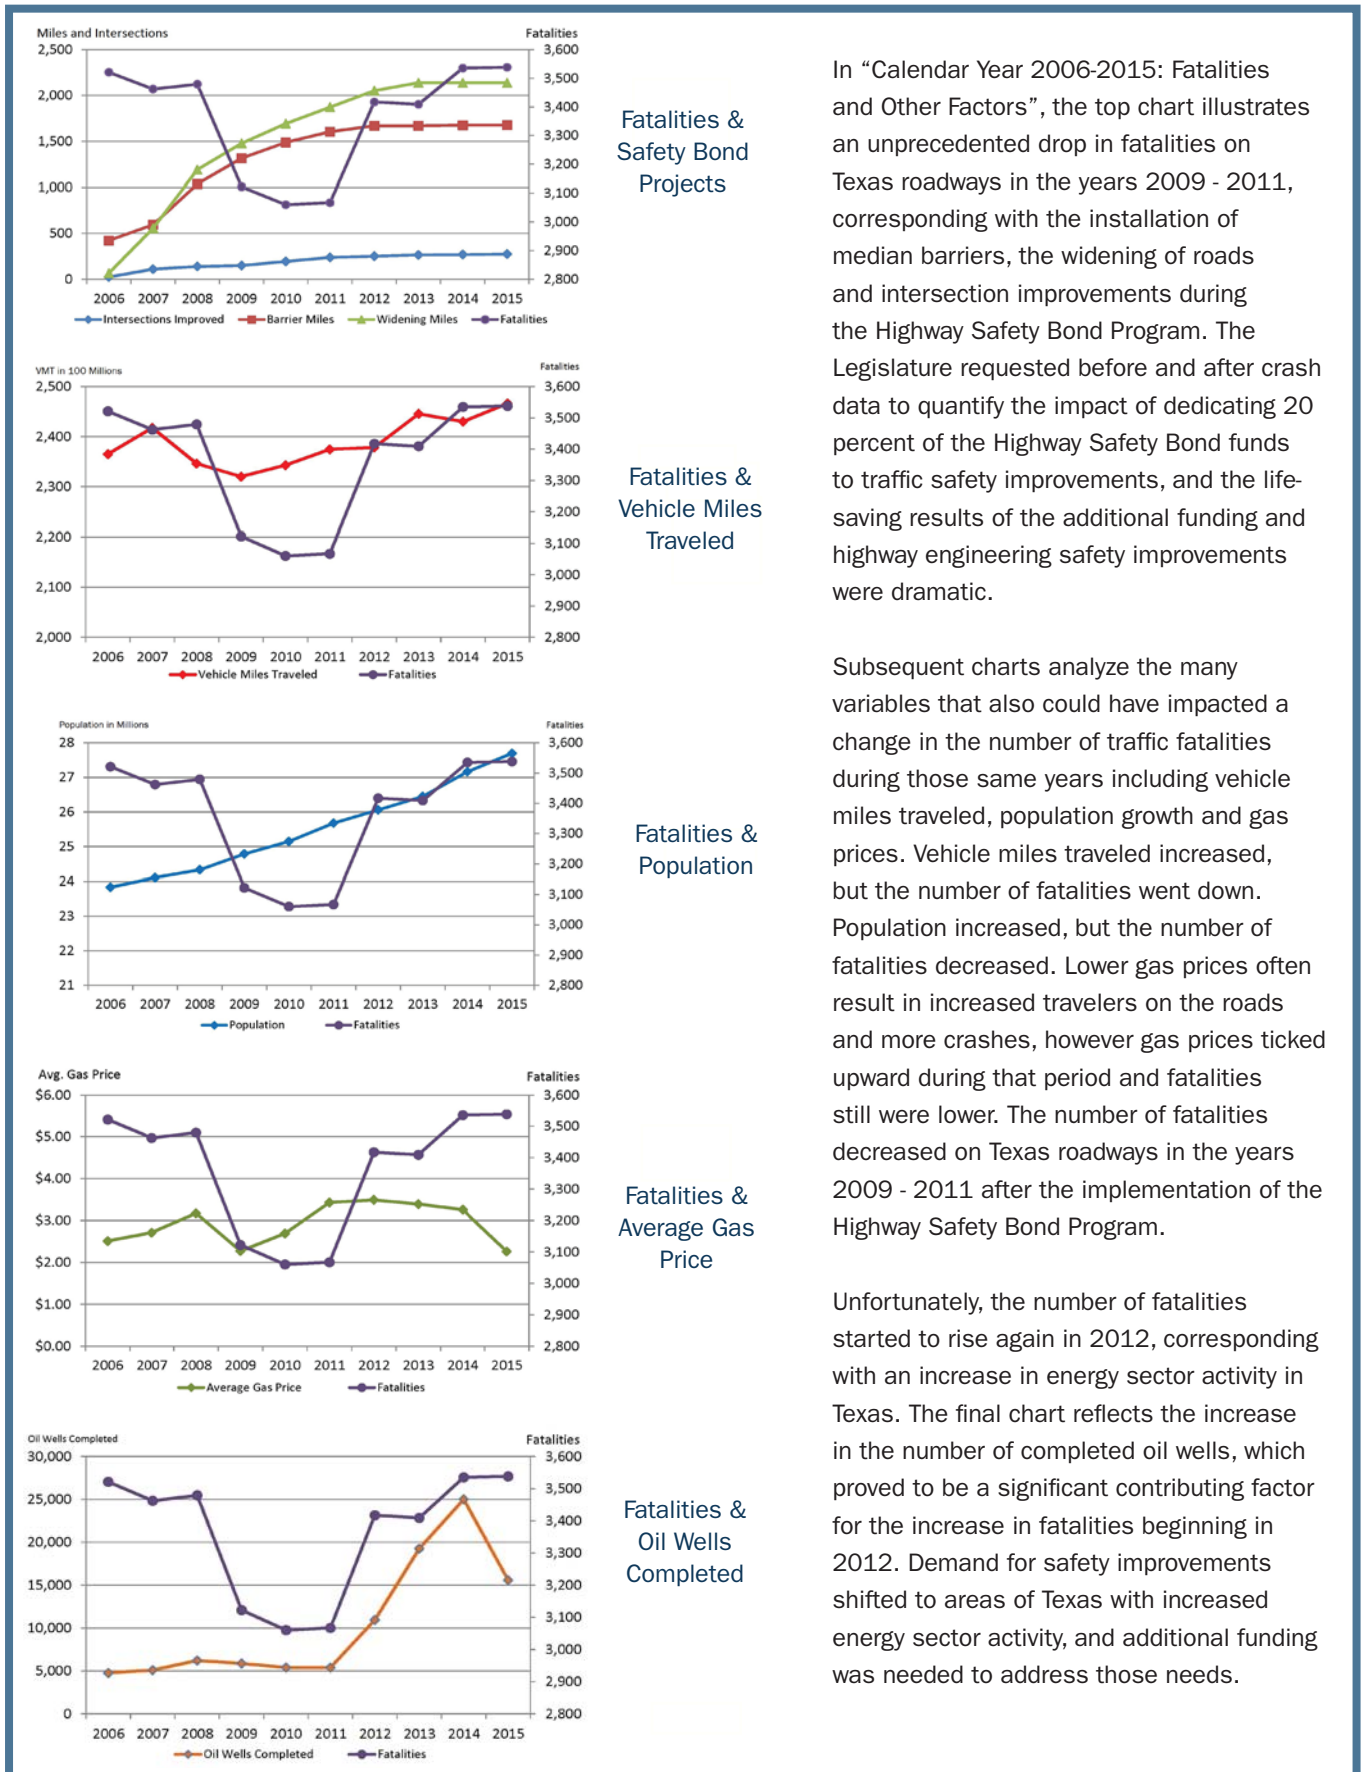

Based on quantifiable results of the Highway Safety Bond Program, further investment in these traffic safety improvements could reduce the anticipated number of deaths on Texas roadways to below 3,800 lives in 2023. That goal represents more than 540 lives saved each year, and hundreds of families spared immeasurable grief. In terms of the financial loss to society, these lives lost represent more than \$2.5 billion a year, according to the National Safety Council. This is a far greater number than the \$540 million average annual cost over five years of implementing many of these highway safety engineering improvements and driver behavior education and enforcement programs. Texas could reap up to \$12 for every \$1 spent for these improvements in five years, and many of these traffic safety improvements will continue preventing deaths and serious injuries for up to 20 years.

The Texas Traffic Safety Task Force has developed a five-year proposal for achieving a significant reduction in fatalities on Texas roadways. A Plan for Saving Lives on Texas Roads utilizes the traffic safety improvements detailed in this report and includes the investment amounts and potential number of lives saved over the five-year plan.

The Texas Traffic Safety Task Force recognizes the Texas Transportation Commission for its multi-pronged approach to reducing crashes and saving lives. The task force presents its initial findings in this report as we aspire toward the ultimate goal of zero deaths on Texas roadways.
