### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

The Miscellaneous Gross Receipts Tax (MGRT) is tax imposed upon gas, electric, and water utility companies based upon the gross receipts from business done in cities and towns with certain population ranges. The deregulation of electric utilities in 1999 changed the way in which these entities conducted business, and Retail Electric Providers (REPs) were created for the purpose of selling electricity at retail to customers across Texas. The current statute includes the word "located" after utility company in determining who is subject to the tax. The placement of the word "located" has led some to conclude that the location of the utility company, rather than the location of the customer, is the determining factor of whether tax is due. This reading is inconsistent with the history of MGRT provisions and would allow REPs to locate in a city with a population of less than 1,000 inhabitants and sell to any location, regardless of population, without being subject to MGRT. The ambiguity created in this argument now places compliant REPs at a competitive disadvantage.

S.B. 559 clarifies current policy that MGRT is imposed on a company that sells retail electric service to a customer located in a town or city with a population of 1,000 or more, regardless of where the company is located. (Original Author's / Sponsor's Statement Of Intent)

C.S.S.B. 559 amends current law relating to the application of the miscellaneous gross receipts tax on utility companies.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
