AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Mental health first aid (MHFA) is an evidence-based training program that educates non-medical professionals about strategies and resources to respond to an individual who is developing a mental health problem or experiencing a crisis. Participants learn how to assess risk, listen to and support the individual in crisis, and identify professional resources and supports. The program can be taught to anyone, although it is especially relevant for key community professionals such as teachers, health care workers, police officers, and faith leaders who regularly interact with Texas youth.

The 83rd Legislature passed H.B. 3793 to provide voluntary, no-cost MHFA training to educators. Last session, S.B. 133 expanded the availability of free MHFA training beyond teachers to include school counselors, nurses, teacher's aides, school bus drivers, principals, assistant principals, and school resource officers.

S.B. 1533 amends current law relating to MHFA training for employees of institutions of higher education.

As proposed, S.B. 1533 amends current law relating to mental health first aid training for university employees.
