H.B. No. 2948

## A BILL TO BE ENTITLED 1 AN ACT 2 relating to the state and regional water planning process. 3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS: 4 SECTION 1. Subchapter C, Chapter 16, Water Code, is amended 5 by adding Section 16.052 to read as follows: 6 Sec. 16.052. INTERREGIONAL PLANNING COUNCIL. (a) The board, at an appropriate time in each five-year cycle for the 7 adoption of a new state water plan, shall appoint an interregional 8 9 planning council. The members of the council serve until a new state water plan is adopted. 10 11 (b) The council consists of one member of each regional 12 water planning group. Each regional water planning group shall nominate one or more members for appointment to the council, and the 13 14 board shall consider the nominations in making appointments to the council. 15 16 (c) The purposes of the council are to: (1) improve coordination among the regional water 17 planning groups, and between each regional water planning group and 18 the board, in meeting the goals of the state water planning process 19 and the water needs of the state as a whole; 20 21 (2) facilitate dialogue regarding water management strategies that could affect multiple regional water planning 22 23 areas; and 24 (3) share best practices regarding operation of the

H.B. No. 2948 1 regional water planning process. 2 (d) <u>The council shall:</u> 3 (1) hold at least one public meeting; and 4 (2) prepare a report to the board on the council's 5 work. 6 SECTION 2. Section 16.053(e), Water Code, as amended by 7 Chapters 756 (H.B. 2031), 990 (H.B. 30), and 1180 (S.B. 1101), Acts 8 of the 84th Legislature, Regular Session, 2015, is reenacted and amended to read as follows: 9 10 (e) Each regional water planning group shall submit to the 11 development board a regional water plan that: 12 (1)is consistent with the guidance principles for the state water plan adopted by the development board under Section 13 14 16.051(d); 15 (2) provides information based on data provided or approved by the development board in a format consistent with the 16 17 guidelines provided by the development board under Subsection (d); (2-a) is consistent with the desired future conditions 18 19 adopted under Section 36.108 for the relevant aquifers located in the regional water planning area as of the date the board most 20 recently adopted a state water plan under Section 16.051 or, at the 21 option of the regional water planning group, established subsequent 22 23 to the adoption of the most recent plan; provided, however, that if 24 no groundwater conservation district exists within the area of the regional water planning group, the regional water planning group 25 shall determine the supply of groundwater for regional planning 26 purposes; the Texas Water Development Board shall review and 27

approve, prior to inclusion in the regional water plan, that the groundwater supply for the regional planning group without a groundwater conservation district in its area is physically compatible, using the board's groundwater availability models, with the desired future conditions adopted under Section 36.108 for the relevant aquifers in the groundwater management area that are regulated by groundwater conservation districts;

8

(3) identifies:

9 (A) each source of water supply in the regional 10 water planning area, including information supplied by the 11 executive administrator on the amount of modeled available 12 groundwater in accordance with the guidelines provided by the 13 development board under Subsections (d) and (f);

14 (B) factors specific to each source of water 15 supply to be considered in determining whether to initiate a 16 drought response;

17 (C) actions to be taken as part of the response; 18 [and]

(D) existing major water infrastructure
 facilities that may be used for interconnections in the event of an
 emergency shortage of water; <u>and</u>

(E) unnecessary or counterproductive variations in specific drought response strategies, including outdoor watering restrictions, among user groups in the regional water planning area that may confuse the public or otherwise impede drought response efforts;
(4) has specific provisions for water management

1 strategies to be used during a drought of record;

2 (5) includes but is not limited to consideration of 3 the following:

4 (A) any existing water or drought planning
5 efforts addressing all or a portion of the region and potential
6 impacts on public health, safety, or welfare in this state;

7 (B) approved groundwater conservation district
8 management plans and other plans submitted under Section 16.054;

9 (C) all potentially feasible water management 10 strategies, including but not limited to improved conservation, 11 reuse, and management of existing water supplies, conjunctive use, 12 acquisition of available existing water supplies, and development 13 of new water supplies;

14 (D) protection of existing water rights in the 15 region;

16 (E) opportunities for and the benefits of 17 developing regional water supply facilities or providing regional 18 management of water supply facilities;

(F) appropriate provision for environmental water needs and for the effect of upstream development on the bays, estuaries, and arms of the Gulf of Mexico and the effect of plans on navigation;

(G) provisions in Section 11.085(k)(1) if
 interbasin transfers are contemplated;

(H) voluntary transfer of water within the region
using, but not limited to, regional water banks, sales, leases,
options, subordination agreements, and financing agreements;

1 (I) emergency transfer of water under Section 2 11.139, including information on the part of each permit, certified 3 filing, or certificate of adjudication for nonmunicipal use in the 4 region that may be transferred without causing unreasonable damage 5 to the property of the nonmunicipal water rights holder; and

6 (J) opportunities for and the benefits of 7 developing large-scale desalination facilities for:

8 <u>(i)</u> marine seawater that serve local or 9 regional entities; <u>and</u>

10 <u>(ii)</u> [<del>(J)</del> opportunities for and the 11 benefits of developing large-scale desalination facilities for 12 seawater or] brackish groundwater that serve local or regional 13 brackish groundwater production zones identified and designated 14 under Section 16.060(b)(5);

15 (6) identifies river and stream segments of unique 16 ecological value and sites of unique value for the construction of 17 reservoirs that the regional water planning group recommends for 18 protection under Section 16.051;

(7) assesses the impact of the plan on unique river and stream segments identified in Subdivision (6) if the regional water planning group or the legislature determines that a site of unique ecological value exists;

(8) describes the impact of proposed water projects on
water quality; [and]

(9) includes information on:
(A) projected water use and conservation in the
regional water planning area; and

(B) the implementation of state and regional
 water plan projects, including water conservation strategies,
 necessary to meet the state's projected water demands;

4 (10) if the regional water planning area has
5 significant identified water needs, provides a specific assessment
6 of the potential for aquifer storage and recovery projects to meet
7 those needs;

8 <u>(11) sets one or more specific goals for gallons of</u> 9 <u>water use per capita per day in each decade of the period covered by</u> 10 <u>the plan for the municipal water user groups in the regional water</u> 11 <u>planning area; and</u>

12 (12) assesses the progress of the regional water 13 planning area in encouraging cooperation between water user groups 14 for the purpose of achieving economies of scale and otherwise 15 incentivizing strategies that benefit the entire region.

16 SECTION 3. Section 16.053(i), Water Code, is amended to 17 read as follows:

The regional water planning groups shall submit their 18 (i) 19 adopted regional water plans to the board by January 5, 2001, for approval and inclusion in the state water plan. In conjunction with 20 21 the submission of regional water plans, each planning group should make legislative recommendations, if any, to facilitate more 22 voluntary water transfers in the region or for any other changes 23 24 that the members of the planning group believe would improve the water planning process. Subsequent regional water plans shall be 25 26 submitted at least every five years thereafter. Public participation for revised regional plans 27 shall follow the

1 procedures under Subsection (h).

2 SECTION 4. To the extent of any conflict, this Act prevails 3 over another Act of the 85th Legislature, Regular Session, 2017, 4 relating to nonsubstantive additions to and corrections in enacted 5 codes.

6 SECTION 5. The Texas Water Development Board shall appoint 7 the members of the initial interregional planning council under 8 Section 16.052, Water Code, as added by this Act, not later than 9 September 1, 2018.

10 SECTION 6. This Act takes effect immediately if it receives 11 a vote of two-thirds of all the members elected to each house, as 12 provided by Section 39, Article III, Texas Constitution. If this 13 Act does not receive the vote necessary for immediate effect, this 14 Act takes effect September 1, 2017.
