AN ACT
relating to the conversion of plastics and other recoverable materials through pyrolysis or gasification.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Section 361.003, Health and Safety Code, is amended by amending Subdivisions (25), (34), (35), and (36) and adding Subdivisions (10-a), (10-b), (24-a), (25-a), (25-b), and (26-a) to read as follows:

(10-a) "Gasification" means a process through which recoverable feedstocks are heated and converted into a fuel-gas mixture in an oxygen-deficient atmosphere and the mixture is converted into a valuable raw, intermediate, or final product, including a plastic, monomer, chemical, wax, lubricant, or chemical feedstock or crude oil, diesel, gasoline, diesel and gasoline blendstock, home heating oil, ethanol, or another fuel. The term does not include incineration.

(10-b) "Gasification facility" means a facility that receives, separates, stores, and converts post-use polymers and recoverable feedstocks using gasification. The commission may not consider a gasification facility to be a hazardous waste management facility, a solid waste management facility, or an incinerator.

(24-a) "Post-use polymers" means plastic polymers that derive from any household, industrial, community, commercial, or other sources of operations or activities that might otherwise
become waste if not converted into a valuable raw, intermediate, or final product. Post-use polymers include used polymers that contain incidental contaminants or impurities such as paper labels or metal rings but do not include used polymers mixed with solid waste, medical waste, hazardous waste, electronic waste, tires, or construction or demolition debris.

(25) "Processing" means the extraction of materials from or the transfer, volume reduction, conversion to energy, or other separation and preparation of solid waste for reuse or disposal. The term includes the treatment or neutralization of hazardous waste designed to change the physical, chemical, or biological character or composition of a hazardous waste so as to neutralize the waste, recover energy or material from the waste, render the waste nonhazardous or less hazardous, make it safer to transport, store, or dispose of, or render it amenable for recovery or storage, or reduce its volume. The term does not include:

(A) pyrolysis or gasification; or

(B) activities concerning those materials exempted by the administrator of the United States Environmental Protection Agency under the federal Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. Section 6901 et seq.), unless the commission determines that regulation of the activity under this chapter is necessary to protect human health or the environment.

(25-a) "Pyrolysis" means a manufacturing process through which post-use polymers are heated in an oxygen-deficient atmosphere until melted and thermally decomposed and then cooled,
H.B. No. 1953

condensed, and converted into a valuable raw, intermediate, or final product, including a plastic, monomer, chemical, wax, lubricant, or chemical feedstock or crude oil, diesel, gasoline, diesel and gasoline blendstock, home heating oil, ethanol, or another fuel. The term does not include incineration.

(25-b) "Pyrolysis facility" means a manufacturing facility that receives, separates, stores, and converts post-use polymers using pyrolysis. The commission may not consider a pyrolysis facility to be a hazardous waste management facility, a solid waste management facility, or an incinerator.

(26-a) "Recoverable feedstock" means one or more of the following materials, derived from recoverable waste other than coal refuse, that has been processed so that it may be used as feedstock in a gasification facility:

(A) post-use polymers; and

(B) material, including municipal solid waste containing post-use polymers and other post-industrial waste containing post-use polymers, that has been processed into a fuel or feedstock for which the commission or the United States Environmental Protection Agency has made a non-waste determination under 40 C.F.R. Section 241.3(c).

(34) This subdivision expires on delegation of the Resource Conservation and Recovery Act of 1976 authority to the Railroad Commission of Texas. Subject to the limitations of 42 U.S.C. Section 6903(27) and 40 C.F.R. Section 261.4(a), "solid waste" means garbage, rubbish, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution
control facility, and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, municipal, commercial, mining, and agricultural operations and from community and institutional activities. The term:

(A) does not include:

(i) solid or dissolved material in domestic sewage, or solid or dissolved material in irrigation return flows, or industrial discharges subject to regulation by permit issued under Chapter 26, Water Code;

(ii) soil, dirt, rock, sand, and other natural or man-made inert solid materials used to fill land if the object of the fill is to make the land suitable for the construction of surface improvements; 

(iii) waste materials that result from activities associated with the exploration, development, or production of oil or gas or geothermal resources and other substance or material regulated by the Railroad Commission of Texas under Section 91.101, Natural Resources Code, unless the waste, substance, or material results from activities associated with gasoline plants, natural gas or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants and is hazardous waste as defined by the administrator of the United States Environmental Protection Agency under the federal Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. Section 6901 et seq.); or
(iv) post-use polymers or recoverable feedstocks processed through pyrolysis or gasification that do not qualify as hazardous waste under the Resource Conservation and Recovery Act of 1976 (42 U.S.C. Section 6901 et seq.); and

(B) does include hazardous substances, for the purposes of Sections 361.271 through 361.277[361.280], and

361.343 through 361.345.

(35) This subdivision is effective on delegation of the Resource Conservation and Recovery Act of 1976 authority to the Railroad Commission of Texas. Subject to the limitations of 42 U.S.C. Section 6903(27) and 40 C.F.R. Section 261.4(a), "solid waste" means garbage, rubbish, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility, and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, municipal, commercial, mining, and agricultural operations and from community and institutional activities. The term:

(A) does not include:

(i) solid or dissolved material in domestic sewage, or solid or dissolved material in irrigation return flows, or industrial discharges subject to regulation by permit issued under Chapter 26, Water Code;

(ii) soil, dirt, rock, sand, and other natural or man-made inert solid materials used to fill land if the object of the fill is to make the land suitable for the construction of surface improvements;
H.B. No. 1953

(iii) waste materials that result from activities associated with the exploration, development, or production of oil or gas or geothermal resources and other substance or material regulated by the Railroad Commission of Texas under Section 91.101, Natural Resources Code; or

(iv) post-use polymers or recoverable feedstocks processed through pyrolysis or gasification that do not qualify as hazardous waste under the Resource Conservation and Recovery Act of 1976 (42 U.S.C. Section 6901 et seq.); and

(B) does include hazardous substances, for the purposes of Sections 361.271 through 361.277 [361.280.] and 361.343 through 361.345.

(36) "Solid waste facility" means all contiguous land, including structures, appurtenances, and other improvements on the land, used for processing, storing, or disposing of solid waste. The term includes a publicly or privately owned solid waste facility consisting of several processing, storage, or disposal operational units such as one or more landfills, surface impoundments, or a combination of units. The term does not include a pyrolysis or gasification facility.

SECTION 2. Subchapter B, Chapter 361, Health and Safety Code, is amended by adding Section 361.041 to read as follows:

Sec. 361.041. TREATMENT OF POST-USE POLYMERS AND RECOVERABLE FEEDSTOCKS AS SOLID WASTE. (a) The commission may not consider post-use polymers or recoverable feedstock to be solid waste if they are converted using pyrolysis or gasification into a valuable raw, intermediate, or final product, including a plastic,
monomer, chemical, wax, lubricant, or chemical feedstock or crude oil, diesel, gasoline, diesel and gasoline blendstock, home heating oil, ethanol, or another fuel.

(b) The recycling and reuse of post-use polymers and recoverable feedstocks classified as hazardous waste under federal law are subject to the federal hazardous waste recycling requirements.

SECTION 3. Section 361.119, Health and Safety Code, is amended by adding Subsection (c-1) to read as follows:

(c-1) A facility that reuses or converts recyclable materials through pyrolysis or gasification, and the operations conducted and materials handled at the facility, are not subject to regulation under rules adopted under this section if the owner or operator of the facility demonstrates that:

(1) the primary function of the facility is to convert materials that have a resale value greater than the cost of converting the materials for subsequent beneficial use; and

(2) all the solid waste generated from converting the materials is disposed of in a hazardous solid waste management facility or a solid waste facility authorized under this chapter, as appropriate, with the exception of small amounts of solid waste that may be inadvertently and unintentionally disposed of in another manner.

SECTION 4. Sections 361.421(5), (6), and (8), Health and Safety Code, are amended to read as follows:

(5) "Recyclable material" means material that has been recovered or diverted from the solid waste stream for purposes of
reuse, recycling, or reclamation, a substantial portion of which is consistently used in the manufacture of products which may otherwise be produced using raw or virgin materials. The term includes post-use polymers and recoverable feedstocks that are converted through pyrolysis or gasification into valuable raw, intermediate, and final products. Recyclable material is not solid waste unless the material is deemed to be hazardous solid waste by the Administrator of the United States Environmental Protection Agency, whereupon it shall be regulated accordingly unless it is otherwise exempted in whole or in part from regulation under the federal Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. Section 6901 et seq.), by Environmental Protection Agency regulation. However, recyclable material may become solid waste at such time, if any, as it is abandoned or disposed of rather than recycled, whereupon it will be solid waste with respect only to the party actually abandoning or disposing of the material.

(6) "Recycled material" means materials, goods, or products that consist of recyclable material or materials derived from postconsumer waste, industrial waste, or hazardous waste which may be used in place of a raw or virgin material in manufacturing a new product. The term includes post-use polymers and recoverable feedstocks used in pyrolysis or gasification.

(8) "Recycling" means a process by which materials that have served their intended use or are scrapped, discarded, used, surplus, or obsolete are collected, separated, or processed and returned to use in the form of raw materials in the production
of new products. Recycling includes:

(A) the composting process if the compost material is put to beneficial reuse as defined by the commission;

(B) the application to land, as organic fertilizer, of processed sludge or biosolids from municipal wastewater treatment plants and other organic matter resulting from poultry, dairy, livestock, or other agricultural operations; and

(C) the conversion of post-use polymers and recoverable feedstocks through pyrolysis or gasification.

SECTION 5. As soon as practicable after the effective date of this Act, the Texas Commission on Environmental Quality shall adopt rules necessary to implement the changes in law made by this Act.

SECTION 6. This Act takes effect immediately if it receives a vote of two-thirds of all the members elected to each house, as provided by Section 39, Article III, Texas Constitution. If this Act does not receive the vote necessary for immediate effect, this Act takes effect September 1, 2019.
H.B. No. 1953

President of the Senate

Speaker of the House

I certify that H.B. No. 1953 was passed by the House on April 16, 2019, by the following vote: Yeas 130, Nays 5, 1 present, not voting.

Chief Clerk of the House

I certify that H.B. No. 1953 was passed by the Senate on May 3, 2019, by the following vote: Yeas 31, Nays 0.

Secretary of the Senate
