Fiscal Analysis

The bill would amend Chapter 531 of the Government Code to authorize the Health and Human Services Commission (HHSC) to retain up to one percent of funds received to operate certain health care programs under the Medicaid program to pay for implementation of those programs.

Methodology

This analysis assumes that implementing the provisions of the bill would cost \$2.6 million in All Funds in fiscal year 2020 and \$2.1 million in All Funds in every year thereafter. HHSC estimates that it would need 10.1 Full-Time Equivalent positions (FTEs) to administer and oversee certain health care programs under the Medicaid program in each fiscal year. HHSC anticipates salary and employee benefit costs of \$1.1 million in each fiscal year. The agency estimates additional operating expenses of \$1.1 million in fiscal year 2020 and \$1.0 million in every year thereafter. This analysis assumes one-time information technology costs of \$0.4 million in fiscal year 2020.

HHSC indicates that approximately \$5.3 billion would be available in fiscal year 2020 to operate certain health care programs under the Medicaid program. This analysis assumes that the agency would retain one percent of this amount, resulting in a revenue gain of \$53.0 million in All Funds in each fiscal year. However, HHSC indicates that it would not need to retain the entire one percent as provided by the bill to administer and oversee those programs.

Technology

This analysis assumes one-time information technology costs of \$0.4 million in fiscal year 2020 to develop a database of hospital financial and payment information. HHSC indicates it would use the database to run reports, track trends, and comply with audits related to certain health care programs under the Medicaid program.

Local Government Impact

To the extent that HHSC retains funds to pay for implementation of certain health care programs under the Medicaid program as provided by the bill, units of local government may see a loss in revenue related to such program funding.
