Fiscal Analysis

The bill would amend the Education Code to require the Texas Education Agency (TEA) to develop procedures, by rule, to audit and monitor school districts to ensure compliance with dyslexia screening requirements under Education Code Section 38.003. The bill would require monitoring to include periodic site visits. Additionally, the bill would require TEA to develop reasonable and appropriate remedial strategies to address district noncompliance.

Methodology

TEA assumes it would require an additional 4.0 FTEs to develop new procedures related to dyslexia monitoring, conduct the required data analysis and desk audits, conduct periodic onsite monitoring to ensure districts are in compliance with dyslexia screening requirements, and develop reasonable and appropriate remedial strategies to address district noncompliance. Costs associated with the four Program Specialist VIs would total \$444,857 (including salary, benefits and other operating costs) in fiscal year 2020 and \$428,857 in subsequent years.

Additionally, TEA assumes it would require \$20,000 each year for travel to conduct the onsite monitoring reviews.

Local Government Impact

TEA assumes the bill would increase school district costs related to staff time to comply with monitoring activities. This analysis assumes these additional responsibilities could be absorbed using existing resources.
