Fiscal Analysis

The bill would amend the Education Code to require the Texas Education Agency (TEA) to adopt by rule a common admission application form for open-enrollment charter schools and guidelines for charter schools to use waitlists if they receive more applications from students than they have

positions.

The bill would require charter schools to submit information on the number of students enrolled, the enrollment capacity, and the number of students on the waiting list by grade level to TEA by the last Friday in October each year. TEA would be required to compile submitted information and publish such data on its website.

Methodology

This analysis assumes TEA would require 1.0 additional Program Specialist VI to create the common admission application, develop rules for the use of waitlists, and prepare the data for upload to TEA's website each year. Salaries, benefits, and other operating costs for this FTE are assumed to total \$102,214 in fiscal year 2020 and \$98,214 per fiscal year thereafter. TEA assumes IT costs related to the common application and data reporting requirements would total \$40,380 in fiscal year 2020 and \$100,141 in fiscal year 2021.

Technology

TEA assumes the provisions of the bill would require modification of the Texas Student Data System (TSDS) to include eight new data elements, one new complex type, ten new business rules, and three new reports. TEA estimates these modifications would cost \$33,380 in fiscal year 2020 and \$100,141 in fiscal year 2021. Additionally, in fiscal year 2020 TEA assumes it would require \$7,000 for software change requests to update the Charter School Tracking System (CSTS).

Local Government Impact

TEA assumes the bill would have a cost to charter schools to report the required enrollment information to TEA.
