

Mass Violence Prevention and Community Safety, Select Duty 4 - Public Comments from Donald Potts

Any further legal restrictions on firearm ownership, purchase or transfers will be only useless. These proposed restrictions along with “red flag” laws would present only a minor inconvenience to a person intent on harming others while also further infringing on 2nd Amendment rights of citizens.

The country and state are in urgent need of an improved system of dealing with the mentally ill. Our society leaves most very mentally ill people to their own devices, even if that means living on the street and sleeping in doorways. Steps should be taken to intervene long before violence occurs.
