

Interim Charge 2, Question 1: Can a map, detailed list, or other resources be provided that shows where they are gaps in available internet coverage? If so, please provide. What needs to be done to close this gap?

Frisco ISD has provided 433 Kajeets, or “SmartSpots” that provide access to the district’s online learning materials, to families who have reported not having internet access for virtual learning during the COVID-19 pandemic. Most requests to Frisco ISD for a Kajeet have been the result of families reporting that their home internet connection isn’t powerful enough to handle everyone working from home at the same time rather than a result of having no connectivity at all. Frisco ISD is a suburban school district and the large majority of the district has access to reliable internet coverage.
