AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Each legislative session, state agencies project the costs of fulfilling their functions and providing important services for the following two-year budget cycle. This projection, when combined with the biennial revenue estimate, is a key component in the construction of the biennial General Appropriations Act. These estimates are not always accurate and may require certain supplemental appropriations and adjustments to previously appropriated sums to align with revised revenue estimates and supplemental needs. Since the 87th Legislature adjourned, the Comptroller of Public Accounts of the State of Texas has updated the estimate of available revenue. S.B. 11 makes supplemental appropriations and gives direction regarding certain appropriations based on updated cost and revenue estimates.

As proposed, S.B. 11 amends current law relating to making supplemental appropriations and giving direction regarding appropriations.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
