AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Currently, certain orders regarding infectious diseases must be delivered to a person suspected or confirmed to have or to have been exposed to an infectious disease by registered or certified mail or in person. It has been suggested that this is an administrative burden and may needlessly expose other individuals to a potentially infected person.

H.B. 3366 seeks to address these issues by providing for the electronic delivery of certain documents under the Communicable Disease Prevention and Control Act.

H.B. 3366 amends current law relating to authorizing the electronic transmission of certain communications related to the prevention of communicable diseases.

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
