Fiscal Analysis

The bill would amend the Government Code relating to a parity complaint portal and educational materials and parity law training regarding benefits for mental health conditions and substance use disorders to be made available through the portal, and to designate October as mental health condition and substance use disorder parity awareness month.

The bill would require training to include online, print, and in-person formats requiring the Customer

Operations department to form a team of specialists to create educational materials, training and presentation materials, conduct online trainings, and create a webpage to include links of relevant third-party organization educational and additional parity law awareness materials.

Methodology

Based on information provided by the Texas Department of Insurance (TDI), the Complaint Processing section of the Customer Operations division currently maintains a complaint portal which can be modified to accommodate processing mental health parity complaints.

To develop the educational materials required in the bill, TDI has indicated the agency will need 2.0 additional FTEs (Information Specialist V) to develop training content in fiscal year 2022 at a cost of \$202,551 to General Revenue-Dedicated Fund 36.

To develop a prerecorded online training course that can be viewed by all behavioral health providers on-demand, and hold weekly webinars for these same providers, the agency has indicated a need of 1.0 additional FTEs (Information Specialist III) at a cost of \$76,218 per fiscal year to General Revenue-Dedicated Fund 36.

Due to the self-leveling nature of the TDI operating account, any additional appropriations made from the account would be considered in the annual adjustment of the maintenance tax rates. Therefore, the overall revenue into the TDI operating account will be equal to the expenses and no net change in fund balance would occur because of this bill.

Technology

Anticipated technology costs as a result of implementing the bill total \$5,850 in fiscal year 2022 and \$600 in each subsequent fiscal year for software and hardware related to new FTEs.

Local Government Impact

No fiscal implication to units of local government is anticipated.
