

LEGISLATIVE BUDGET BOARD
Austin, Texas

FISCAL NOTE, 87TH LEGISLATIVE REGULAR SESSION

March 30, 2021

TO: Honorable Stephanie Klick, Chair, House Committee on Public Health

FROM: Jerry McGinty, Director, Legislative Budget Board

IN RE: HB2792 by Darby (Relating to a pilot project to provide emergency telemedicine medical services in rural areas.), **As Introduced**

No significant fiscal implication to the State is anticipated.

The bill would amend the Health and Safety Code to reauthorize an existing telemedicine pilot program at Texas Tech University Health Sciences Center that is funded by grant from the Commission on State Emergency Communications (CSEC). The statutory authorization for the existing program expires January 1, 2021. The bill would extend this authorization to January 1, 2027 and would add the pilot program to a list of eligible uses for the 9-1-1 Equalization Surcharge.

According to CSEC, the Commission is able to fund the grant required for this program out of available resources.

According to the Texas Tech University System, the cost of the program cannot be determined at this time. However, given that CSEC has indicated that the existing grant could continue to be funded out of available resources this analysis assumes any costs to the Texas Tech University System could be absorbed using existing resources.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
