Please understand how energy efficiency will make a difference for both pricing, by reducing costs, as well as supporting the act of conversation. Children should learn about their new installations and why they are advantageous.

woodcreek, TX

I support this bill, and ask all involved to do the same to help protect our waterways.

Penny Bradshaw

Retired, Self

Spring, TX

I am happy to convey my support for HB 351 – the bill that sets up air filtration efficiency standards at educational and childcare facilities and requires routine testing to ensure that these standards are met, as well as making the test results easily available to the public.

Please vote yes for this bill.

Thank you, Penny Bradshaw

This is a great idea. We should make sure the air is clean and safe for our young ones. Please support this bill. It could make an important difference in the health of our youth.

We need to protect our clean rivers !!! They will never be the same if we don't stop contamination !!!
