I selected this bill as the HB 1410 is not showing up as a selection. I do want all the people representatives to read this comment. I am writing in reference to bill HB 1410. Texans does not need any more taxation on their homes. Please do not vote for this bill. It will only add another taxing authority to our already extremely high property tax base. After the authority establishment. It will never go away and will continually increase the percentages of the property's value. As have all the other Texas taxing authorities.
