HB 1637

HOUSE COMMITTEE ON HOUSE ADMINISTRATION

---

Hearing Date: April 13, 2021 9:00 AM

---

H Apley

Self

Dickinson, TX

H Scott Apley offering written testimony in opposition to HB 1637.

I can not tell you the damage that has been done to our society from this kind of subjective and theoretical based ideology. We are doing great harm to our private businesses and public institutions by manipulating and forcing this kind of nonsense on them by agenda-driven special interest groups under the threat of "cancelling" or public intimidation. This idea that we are going to accuse people of unconscience social crimes with no evidence to support it is contrary to our core American values. And furthermore, this kind of universal guilt also harms our ability to address and condemn actual instances of the kinds of bias and discrimination that is universally rejected by the American people including especially the people of Texas. We need to stop propagating the idea that we are going to force Legislators and their staffs to set in a training environment and be forced to listen to all the reasons they should apologize for their existence and accept ownership of wrongdoing they have not done is reprehensible and should be summarily dismissed.

Thank you for your time.
