

PUBLIC COMMENTS

HB 3341

HOUSE COMMITTEE ON ELECTIONS

---

Hearing Date: April 15, 2021 8:00 AM

---

John Strawther

Aside from major privacy concerns, this grants too much discretionary power to an election judge, including judging whether or not a document is fake, which is a heavy accusation.

I support the idea of video recording ballot counting. I would like to see the population ranges changed, and there be five pilots of three counties in each. The first counties with population above 500,000. The second counties with a population of 200,000 to 500,000. The third counties with a population of 100,000 to 200,000. The fourth 10,000 to 100,000. The final less than 10,000. This way all county sizes would be represented in the pilot. And the counties to participate in each population group should consist of one county that volunteers to participate and one that does not. This would increase the chances of having more diversity of counties participating. And add a retention requirement and a requirement to forward the recordings to the Legislature or Sec of State. Perhaps consider having the recordings posted online by the county, and/or broadcast live. Please consider these changes, thank you.

I oppose this bill because it is dangerously poorly worded. It states that "counties" shall participate, but of course counties can't record things. I'm assuming you mean people from these counties. Who are these people from these six counties who will be chosen? What will be the basis of their selection? What prevents these people from being party hacks ready and willing to make the final ballot count be what the secretary of state prefers it to be? Why not stipulate 12 people from 6 counties, 6 of whom are from each party? You claim to be passing legislation to prevent voter fraud. HB 3341 is just another way to steal an election, based on the big lie that the 2020 election was stolen. Shame on you.

Testing a program is good.

However, recording the activities at the counting stations should have been tested years ago when the reports of possible fraud had been reported. When poll watchers are prevented from "seeing" or "hearing" what is going on - at the polls or at the counting stations or at the ballot board - there is no reason to believe "all is well."

Those elected officials who were voted into office to represent the citizens of TX were not given that responsibility so that they could close their eyes and ears and pretend everything was OK. Once that happens, you are no longer friend of the voter, but of the fraudsters.

The pilot program for video recording would certainly be needed to find out the cost and if the program would work.

OPPOSE

JoAnn Fleming, Executive Director

Grassroots America - We the People PAC

Flint, TX

JoAnn Fleming, Executive Director, Grassroots America - We the People PAC, speaking for the organization:

Grassroots America strongly supports HB 3341 by Swanson.

We believe a pilot program for video recording ballot counting station activity implemented by the Secretary of State is a strong start toward increasing transparency along the entire voting process. The more transparency, the greater the accountability. We believe this is a good faith start in restoring public confidence in the integrity of our elections.

We urge the House Public Affairs Committee to pass this bill out of committee.

This tabulation supervisor in Fayette County would never countenance having a video recording of the operations of the central counting station scanner. The principal reason is that I would never want a recording of the numerous times that scanner security codes are entered via a touch screen during the ballot scanning process. If there was a single instance of the public release of such a video, then security of the ballot scanning process would be totally undermined.
