Cleveland, TX

Please show full support for HB 3718. Human trafficking is an epidemic and there is too little discussion about it. The media doesn't talk about it, our schools don't talk about it, our churches don't talk about it, yet it happens every day all around us. Posting signs is an easy task yet will have a mighty impact on awareness in the community. For some, a sign might be the first they hear of human trafficking in our community, and will prompt them to take precautions to protect loved ones and notice signs in others as well, especially when posted in front of entities where there is an increased need for awareness. Please show your support for this bill, and help bring the needed awareness to our communities.

Thank you
