Please consider supporting this bill as a service to our children who struggle with suicidal thoughts and actions. We are in the business of providing suicide prevention and making sure our most vulnerable clients, our children, are able to find a safe place to seek treatment.

I am Michael Belsick representing myself. I am AGAINST HB 4041 because suicide is beyond even calling it an extreme rare event in elementary grade kids and younger. There is more risk to young children of an adult that believes that they "see" some sort of risk behavior. If this was aimed at high school or potentially middle school age kids, I would be less concerned about risk to children.
