Involuntarily harvesting organs is a heinous crime against humanity and it needs to be stopped. A country's government doing this is beyond imagination and frightening. Such a practice could easily lead to ethnic cleansing and murders for organ harvesting.

The world has to stand up against such a cruel government and let them know that their actions are condemned by the world and call out those criminals.

Chinese government is leading in human rights violations and hence its much needed to confront their horrible inhuman actions.

I agree with HR 10. The abuse from China towards prisoners is outrageous. Every member in State Affairs and the entire legislation should vote to condemn the Chinese Communist Party.

RE: Support HR 10

Hello,

Please vote in favor of HR 10. I am a 19-year-old student. I am horrified to know that the Chinese Communist Party is forcibly removing living organs from innocent people against their will and selling them to ruthless dealers around the world.

My friend from China who was forced into a labor camp for 2 years, explained that the CCP explicitly targets Falun Gong practitioners like herself primarily because their religion requires them to live a pure and healthy life. Because of this, their organs are "more valuable" to the CCP.

How can we turn an blind eye to these egregious murderous practices? In America, we pride ourselves in protecting individual freedom and fundamental human rights. We have the moral responsibility to do the same for the people of China.

I believe that publicly condemning the CCP is the first step of MANY that we need to take.

Best regards,

Amber

There are many practices that should be condemned taking place by the China CCP. Crimes against its own people can not be ignored. I urge you to vote to send HR 10 condemning organ harvesting to the House floor.
