### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Current law prevents municipalities from conveying land as part of a Chapter 380 economic development agreement. Municipalities have expressed that these statutory requirements to convey or sell land are time-consuming, burdensome, and a disincentive to companies seeking to relocate to Texas.

Allowing the conveyance of land as part of an economic development agreement will create more opportunities to bring businesses to the state by including the conveyance as part of the incentive package. This new incentive would assist in driving down the costs of these economic development agreements to both the state and municipalities by allowing the city the option to integrate the conveyance of the property as an economic incentive, which will permit the city to scale back the extension of incremental sales and property taxes incentives. The conveyance of the property will also allow municipalities to start collecting property taxes on the property conveyed.

S.B. 543 would authorize a municipality to transfer real property it owns to an entity as a part of a Chapter 380 agreement. The entity must prove that it will use the property in a manner that primarily promotes a public purpose of the municipality relating to economic development. The bill would require the agreement to include provisions to ensure the municipality is granted sufficient control to ensure the public purpose is accomplished and the municipality receives the return benefit. Additionally, the bill would require the municipality to provide notice of the land transfer in a local newspaper. Lastly, the bill prohibits a transfer of real property if the property was obtained through eminent domain.

(Original Author's/Sponsor's Statement of Intent)

C.S.S.B. 543 would make it explicitly clear that an economic development agreement cannot contain a transfer of property if the property was obtained through eminent domain.

S.B. 543 amends current law relating to the conveyance of property by a municipality for the public purpose of economic development.
