AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

The Texas State Soil and Water Conservation Board (TSSWCB) supports the state's 216 local soil and water conservation districts through state and federal grants, and together they work with landowners to encourage voluntary natural resource conservation throughout the state. The agency's responsibilities have increased over the last decade to include addressing agricultural and forestry-related water pollution, and providing funding to help maintain, repair, and rehabilitate the state's over 2,000 flood control dams built by the USDA Natural Resources Conservation Service.

The Sunset Advisory Commission recommended several changes to improve the agency's grant administration and management practices related to the dam structural repair grant program. Additionally, the commission recommended continuing the agency for 12 years, with a limited-scope re-review in the 2026-2027 biennium focused on the dam structural repair grant program. S.B. 1424 also continues the Texas Invasive Species Coordinating Committee attached to the agency for 12 years, and updates its statute to reflect the committee's current needs and core function of interagency coordination.

TSSWCB and the Texas Invasive Species Coordinating Committee are subject to abolishment under the Sunset Act on September 1, 2023, unless continued by the legislature.

(Original Author's/Sponsor's Statement of Intent)

S.B. 1424 amends current law relating to the continuation and functions of the State Soil and Water Conservation Board and the Texas Invasive Species Coordinating Committee.
