AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

There is an average of 50 percent error rate over the past decade around our state child welfare investigation findings. Child Protective Service (CPS) findings carry significant impact and consequences and should be determined with the utmost care. They result in a person being registered as a child perpetrator within the state registry system affecting background checks and possible livelihoods of individuals.

S.B. 1447 aims to improve the accuracy of CPS investigative findings by developing a training program for each person who investigates any instance of suspected child abuse, standardizing training and encourage implementation of already existing due process laws and policies within our state child welfare system.

As proposed, S.B. 1447 amends current law relating to a training program for persons investigating suspected child abuse or neglect.
