Fiscal Analysis

The bill would prohibit a health benefit plan from requiring an enrollee to be evaluated for autism spectrum disorder more than once every ten years. The bill would take effect on September 1, 2023 and apply only to a health benefit plan delivered, issued for delivery, or renewed on or after January 1, 2024.

Methodology

According to the Teacher Retirement System (TRS), implementing the provisions of the bill would result in additional costs to the TRS-Care and TRS-ActiveCare health plans by limiting the ability of the benefit plans to require reevaluation of treatment for autism spectrum disorder. This would result in a loss of savings from determining certain treatments are no longer appropriate.

Additional costs to the TRS-Care program are estimated to be \$121,000 for the biennium. Additional costs to the TRS-ActiveCare program are estimated to be \$2.9 million for the biennium. Additional costs would not increase the statutorily required state contributions to the TRS-Care and TRS-ActiveCare programs for the 2024-25 biennium; therefore, no significant fiscal impact to the General Revenue Fund is anticipated. However, the additional costs may result in the need for additional contributions from the State, employers, or members to the TRS-Care and TRS-ActiveCare programs, or for plan benefit changes.

Based on the analysis of the Employees Retirement System, Department of Insurance, Health and Human Services Commission, Texas A&M University System Administrative & General Offices, and the University of Texas System Administration, duties and responsibilities associated with implementing the provisions of the bill could be accomplished by utilizing existing resources.

Local Government Impact

No fiscal implication to units of local government is anticipated.
